# EXECUTIVE SUMMARY

In recent years, the rapid increase in clothing consumption has entrenched fast fashion as a dominant trend, significantly contributing to the growing problem of clothing waste.
This project aims to explore the underlying reasons why consumers frequently discard garments and to propose strategies to extend the lifecycle of clothing.
Our goal is to identify actionable solutions that can mitigate environmental impact while responding to consumer trends in the fashion industry.

Official Web https://b098f5-10.myshopify.com/

## THE OPPORTUNITY

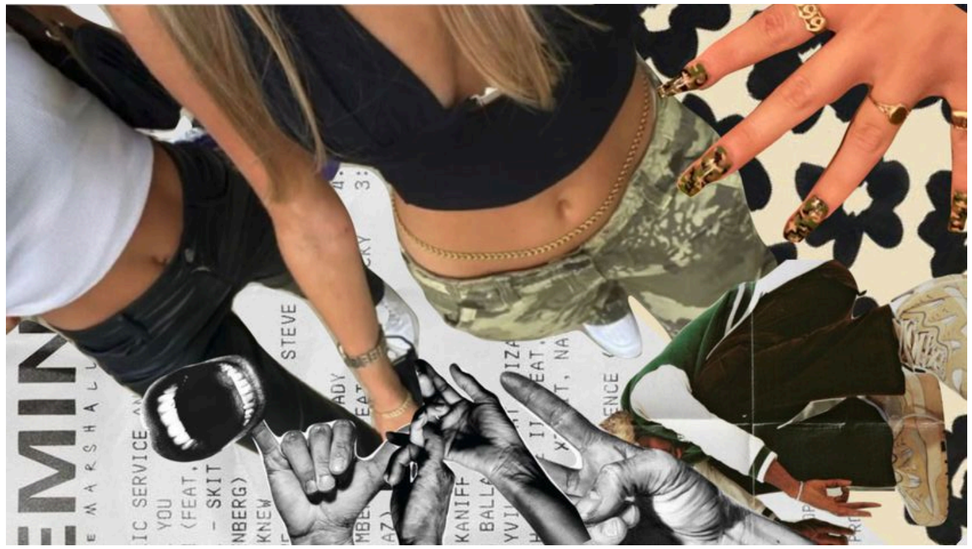
It is well known that the fast fashion industry significantly contributes to environmental pollution. Driven by rapid changes in fashion trends influenced by both the industry and societal shifts, many individuals struggle with problems such as “accumulating outdated garments”, “ill-fitting clothing”or “excess of apparel”, and without knowing how to manage these issues sustainably.

# BACKGROUND

## DESIGN INTENT

Our goal is to extend the lifespan of clothing, reducing the need for frequent wardrobe updates. By doing so, we aim to minimize garment waste and promote environmental sustainability. We hope to allow people to enjoy fashionable designs while also engaging in eco-friendly and sustainable practices. Helps protect the environment but also enables consumers to make more responsible and conscious choices in their clothing selection and use.

# OVERVIEW OF PRIMARY RESAERCH



## INTERVIEW #1

30 minutes
4 people
Aged 19-35
No gender Restrictions
Anyone who loved fashion
Anyone who throw away old clothes

## ONLINE SURVEY #2

14 people
Aged 19-45
No gender Restrictions
6 questions/short answers

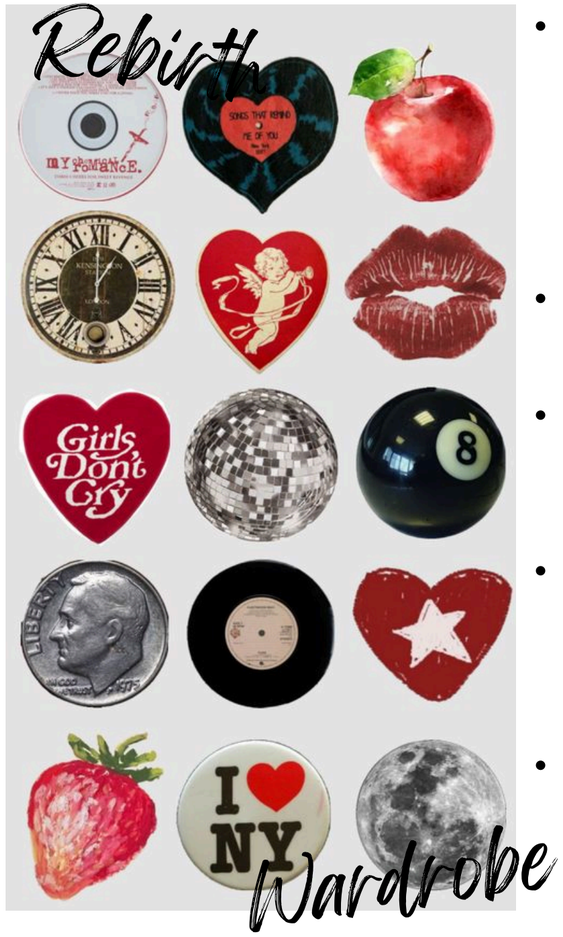
# OVERVIEW OF PRIMARY RESAERCH

*CONSUMER HABITS*

*CLOTHING DISPOSAL*

*SUSTAINABLE PRACTICES*

*PURCHASE DRIVERS*



- **Purchasing Factors:**
  - Consumers consider material, design, fit, and price as important when purchasing clothing.
  - Price is a significant consideration, especially for those on a budget or with financial constraints.
  - Quality is valued for its longevity, while design and brand influence play roles in purchasing decisions.
- **Buying Frequency:**
  - The frequency of purchasing new clothes varies, ranging from every few weeks to every couple of years.
- **Reasons for Disposal:**
  - Common reasons for stopping wearing a piece of clothing include poor fit, style changes, and clothes being out of season or fashion, rather than quality damage or any other basic reasons.
- **Disposal Methods:**
  - Disposed items most often include t-shirts, socks, shirts, and tops.
  - People tend to throw away cheap/bad quality clothing and feel less pressure for doing it. These items are homogeneous and lacks irreplaceability.
- **Sustainability Practices:**
  - Some participants express eco-conscious disposal practices like donating to the underprivileged or selling the clothes.
  - The challenge of buying sustainable or secondhand clothing is noted, with barriers such as sizing problems, safety, sanitation, and aesthetic preferences mentioned.

# JOURNEY MAP

# TARGET AUIDENCE

- *01* Age 15-40
- *02* Don't know how to due with the old clothes
- *03* Having basic environmentally conscious
- *04* Difficulty in keeping up with rapidly changing fashion trends due to financial constraints
- *05* Looking to convey their values through their purchasing behavior

# HMW

Problem 1: our taste in style changes rapidly therefore we throwout old clothing and buy new ones

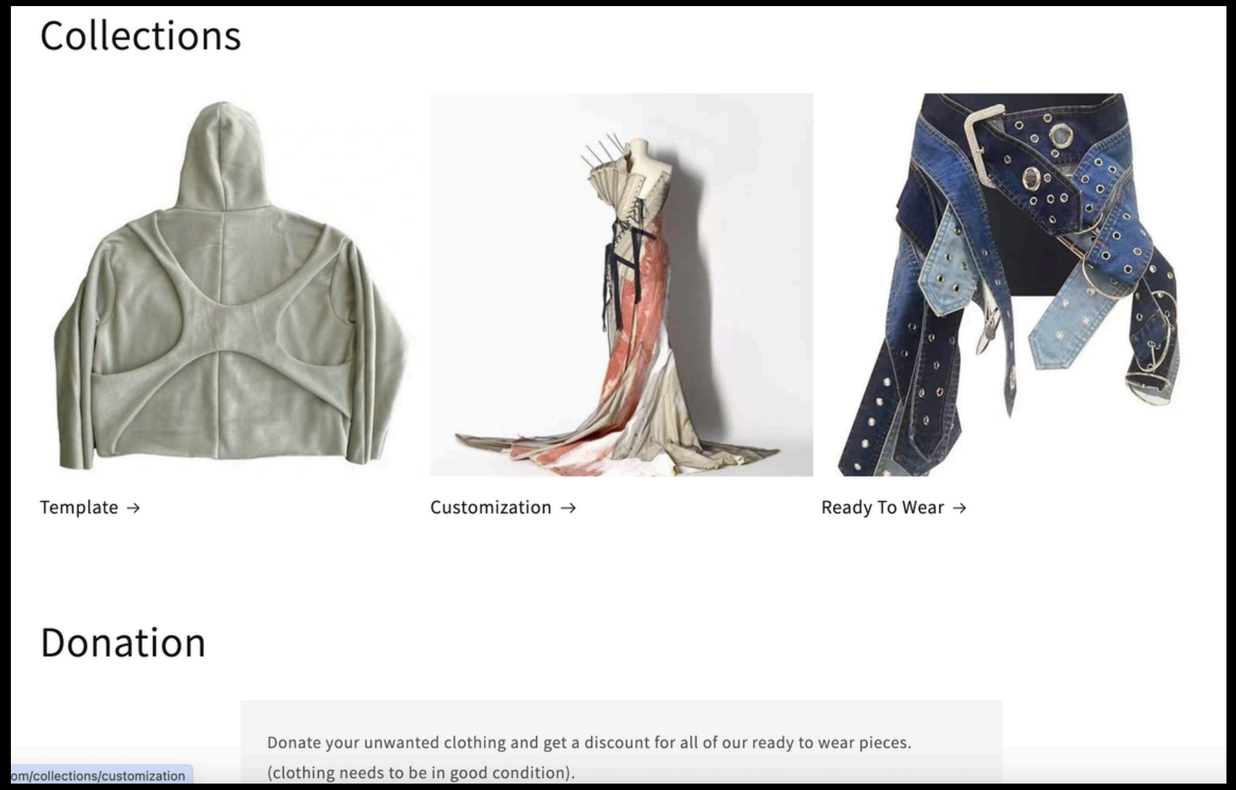
**How might we keep up with the fast changing trends and styles without fast fashion?**

Problem 2: Although most of us have the intention to be more sustainable, it is still a hassle to find sustainable solutions to our unwanted clothing.

How might we make sustainable options more available and accessible?

Problem 3: We throw away clothing that are of poor quality but we don't know it when we purchased it

How might we guarantee the quality of fashion products?



# IDEATION

- A way for us to decrease the buying frequency, was by creating products of more quality. And by refashioning old unpopular trends into new ones using the same fabric: This leads to the idea of customisation.
- Sustainable or second hand fashion often has the problem of sizing, and lack of sanitation. We would take products and create multiple new products using templates. They would act as completely new and different styles.

AARON LOEB DANIEL GALLEGO MATT ZHANG REESE MILLER JULIANA SILVA

# PROTOTYPE -SWOT

## Professional renovation platform

Strengths
- Unique Value Proposition
- Innovation & Creative Design Potential
- Customization Options
- Cost Saving
- Big Market Demand
- Good Environmental Impact

Weaknesses
- Supply Chain Challenges
- Limited Design Options
- Perceived Quality Concerns
- Growing Competition
- Not a Big Trends
- Limited Customer Volume
- Supply Chain Vulnerabilities

Opportunities
- Growing Demand for Sustainable Fashion
- Expansion into New Markets
- Consumer Education

Threats
- Supply Chain Disruptions, availability of used clothing materials or changes in regulations
- Shifting consumer preferences and trends may affect the demand for re-made clothing items, posing a risk to the platform's revenue streams
- Competitive Pressure
- Logistical Challenges

## Style-specific upcycle kit

Strengths
- can be specified to individuals and customised
- cost saving
- good environmental impact

Weaknesses
- not everyone is into diy
- could have a smaller audience (people who are into fashion and wanted their clothing customised)
- requires basic dyeing and sewing skills

Opportunities
- could make a kit for every viral product to make dupes and combat fast fashion
- collaborate with fashion brands

Threats
- might be lacking demand

## T-shirt graphic removal service

Strength
- To repurpose them for sustainability, attract environmentally conscious consumers.
-Provides a cost-effective way to update wardrobe
- Customization options are provided where customers can replace old graphics with new ones

Weakness
- technically challenging
- Potential customers may have low awareness of this service and require a lot of marketing
- The demand for services may be highly dependent on fashion trends and consumer preferences

Opportunities
- Fit with environmental and ethical consumption trends
- opportunities to partner with fashion brands to offer this service directly in stores, thereby expanding the market

Threats
- Advances in fabric technology and manufacturing may introduce new ways to apply

# TESTING

## Prototype Testing Plan

TEAM NAME **Rebirth Wardrobe**
Date, 2017

PLAN

**Hypothesis**
What feature/parts of your concept do you want to test?
Specify the main idea/hypothesis that you want to test

The process of transforming old clothing into stylish, personalized designs is efficient, scalable, and maintains high quality.
Customers are interested in transforming old clothes into new, personalized designs rather than buying new clothes. Even if it comes at a premium

**Assumptions**
What assumptions do we want to prove/disprove?

- ❑ Assumption 1 — The use of environmentally friendly materials and methods in the retrofitting process does not significantly increase the cost or reduce the viability of the service.
- ❑ Assumption 2 — Customers find value in customizing and personalizing their old clothes.
- ❑ etc — Customers will pay a premium for customized and renovated old clothings

**Format**
What is the best way to test that? Use online platforms, including social media and dedicated project websites, to reach out to potential customers to conduct the survey.

CREATE PROTOTYPE

**What do we need to design?**

- ❑ ... An up-cycled version of a piece of clothing that is considered "out of style" at the moment
- ❑ ... creating completely new products with old materials
- ❑ etc

**Who is responsible for what?**

- ❑ Writer
- ❑ Asset Collector
- ❑ Stitcher
- ❑ Other roles...

**Run through**

- ❑ When and where
- ❑ Roles during prototyping sessions

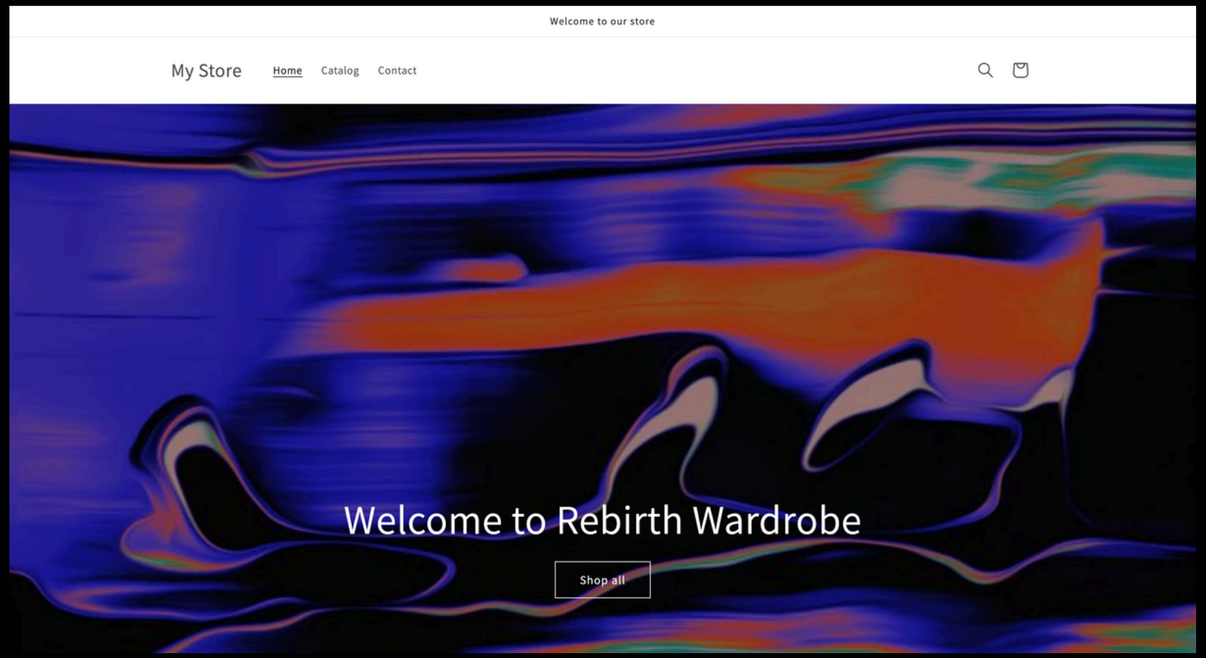
"DRESS UP YOUR MIND AND YOU'LL BE ABLE TO MAKE ALL SORTS OF FASHION STATEMENTS."

# OUR VISION

## REBIRTH WARDROBE
## (PROFESSIONAL RENOVATION PLATFORM)

Transforms old garments into fashionable, personalized new designs.

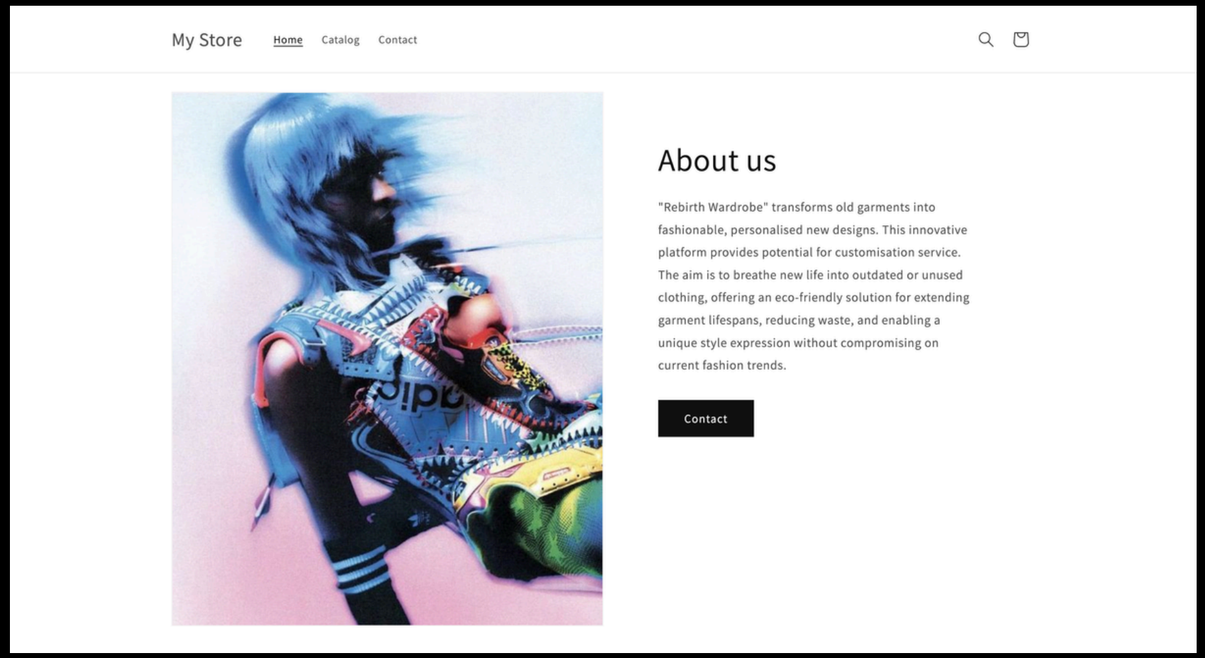
This innovative platform provides potential for customization service. The aim is to breathe new life into outdated or unused clothing, offering an eco-friendly solution for extending garment lifespans, reducing waste, and enabling a unique style expression without compromising on current fashion trends

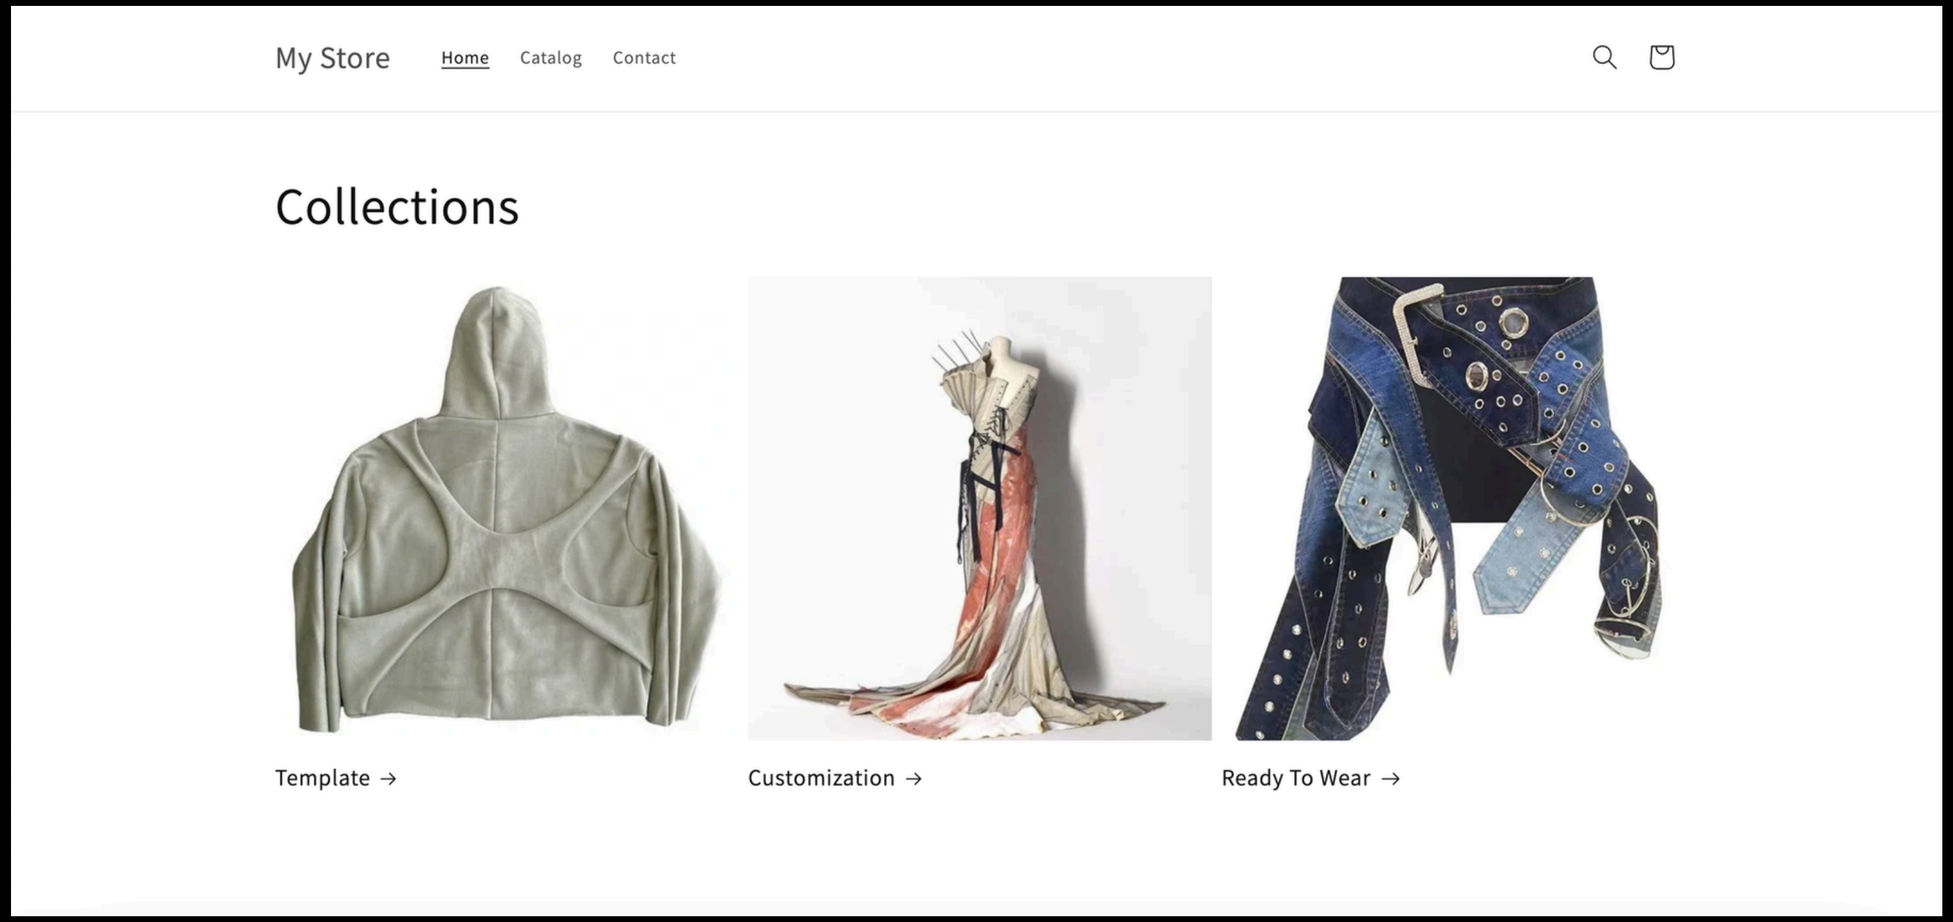


Welcome page, with eye-catching picture, witch also shows the style of the store.

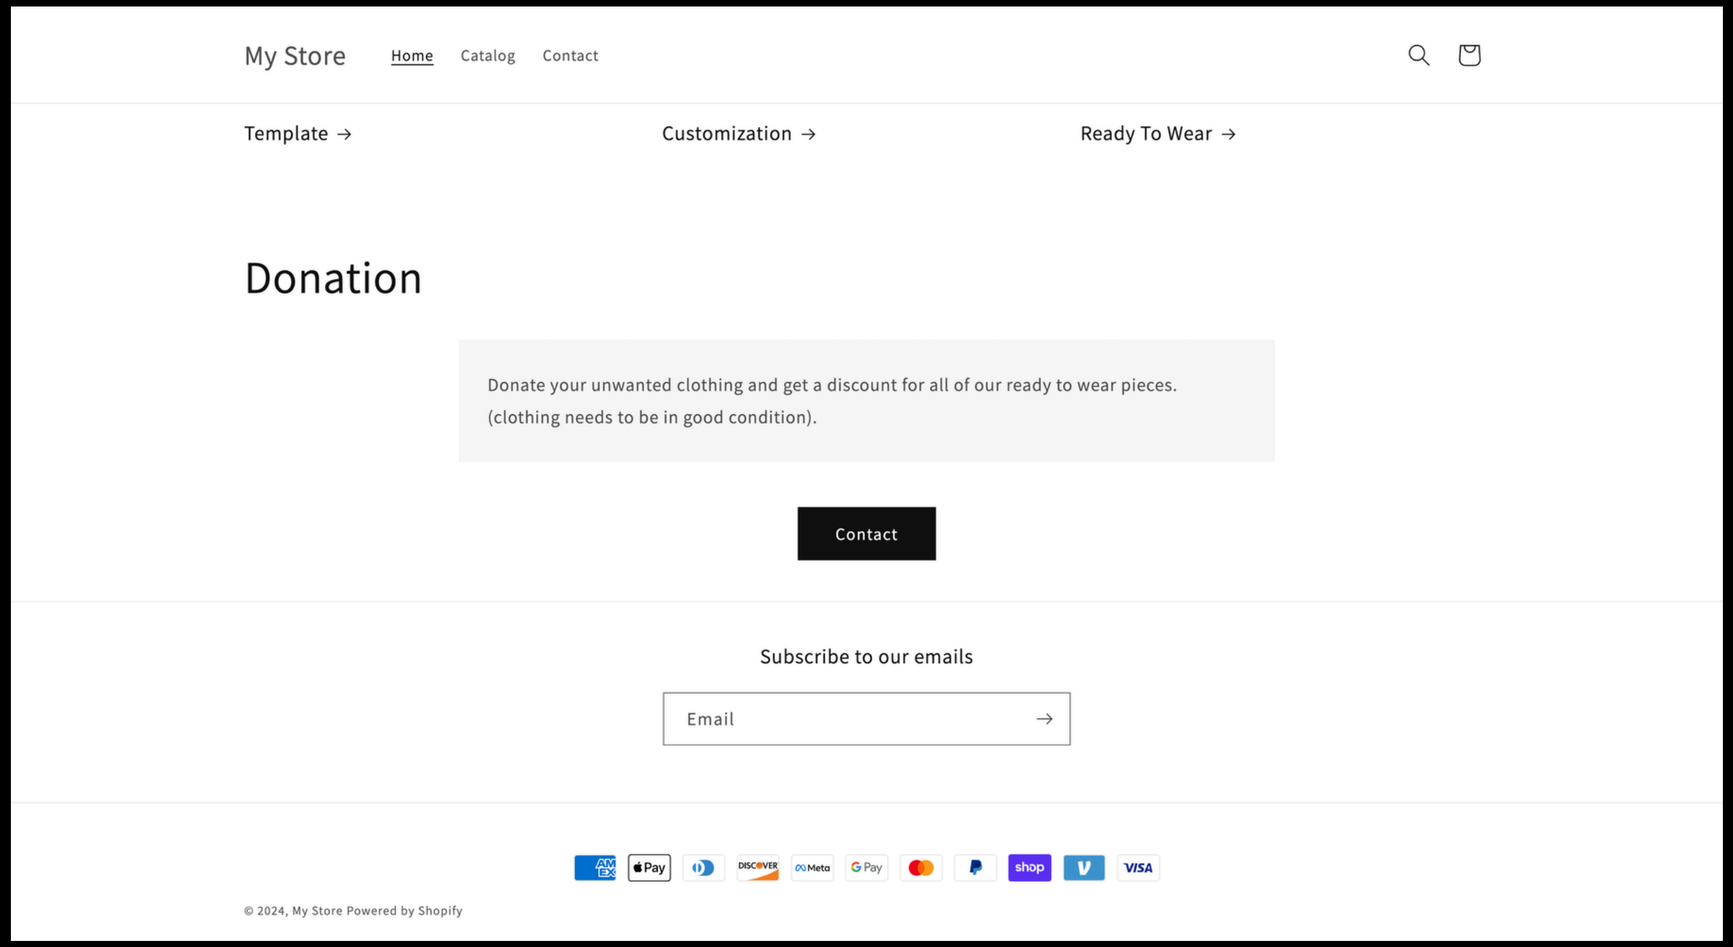
With a little y2k feeling, y2k represents reincarnating fashion to some extent, the theme of this store is also to recycle the old clothes out of season into new fashion.

An Introduction of the store, showing the vision statement of the company, enphasizing its focus on recycling fashion.





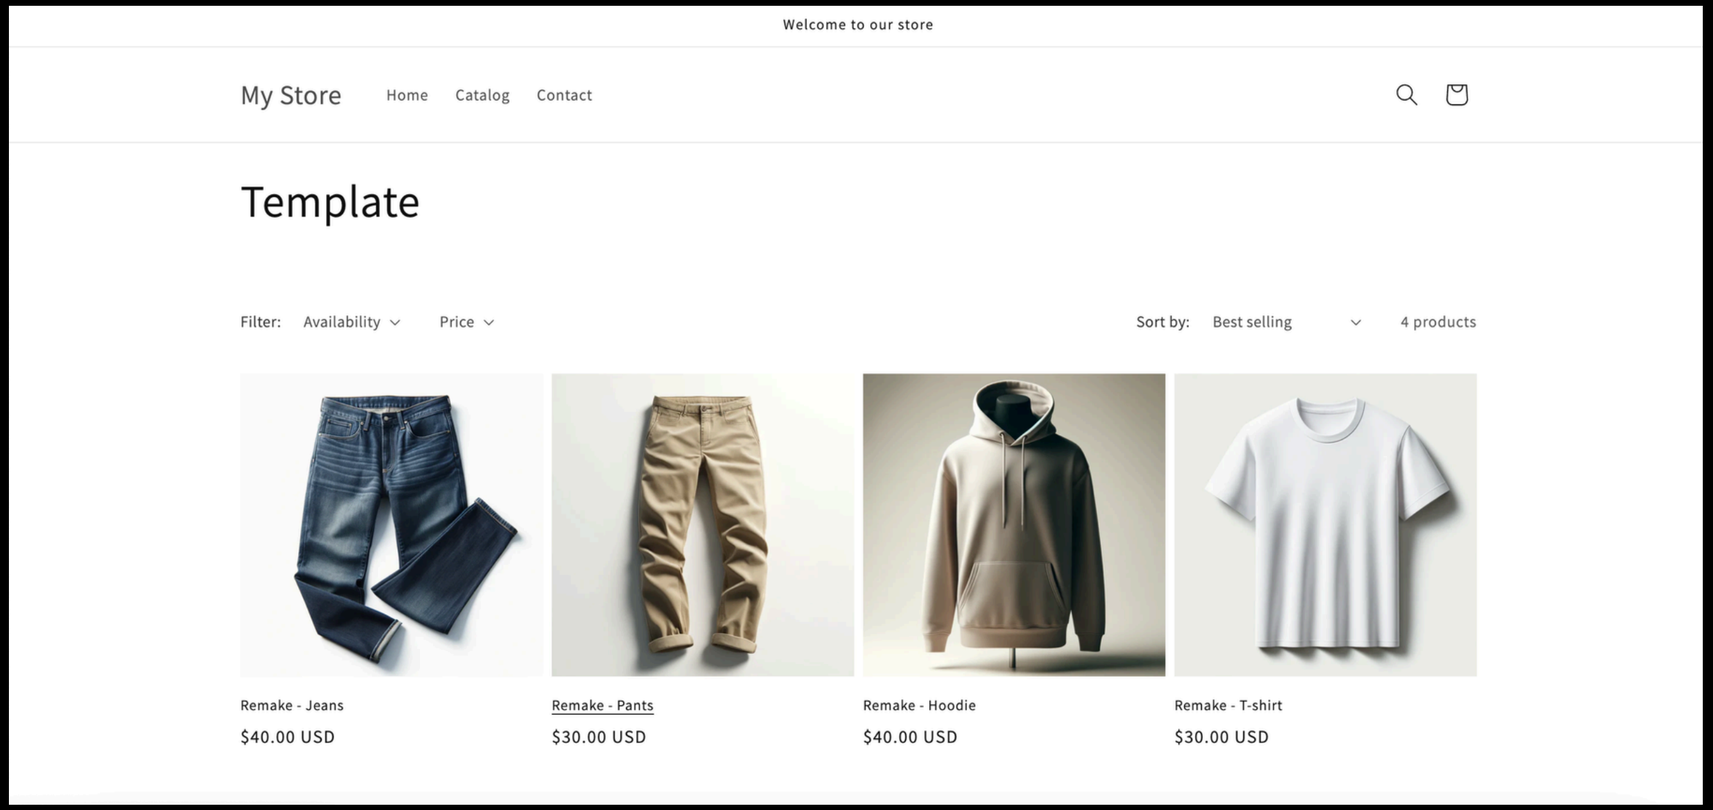
The selection of goods is roughly divided into three collections, existing templet, private customization, and ready-to-wear.



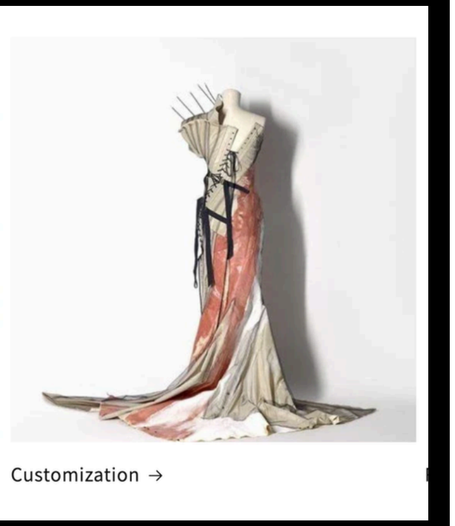
Donation

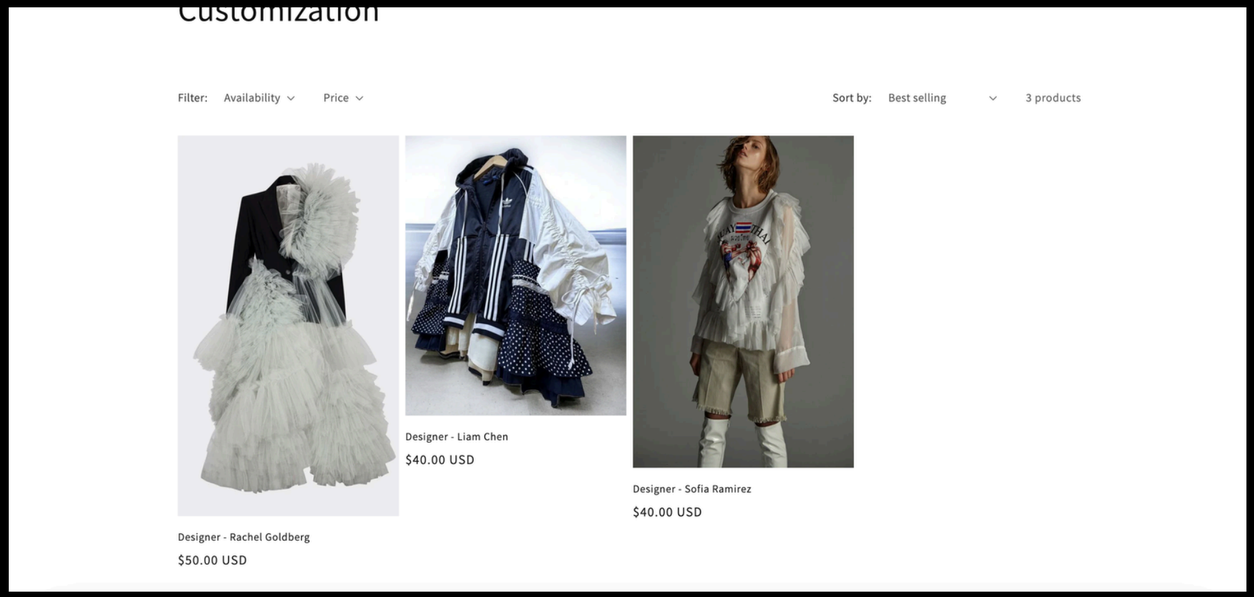
Customers can choose to donate clothes that they do not need and do not want to be remake to the platform. We will collect these donated clothes, remake them, and sell them in ready-to-wear. Customers who donate clothing will receive a discount voucher (depending on how much clothing is donated) that can be used in any service.

Template:
This option is for customers to choose from the existing remake template, which can be used in most basic clothing, such as t-shirts, hoodies and so on. Each item will offer two or three remake templates to choose from, along with a choice of colors and fabrics.

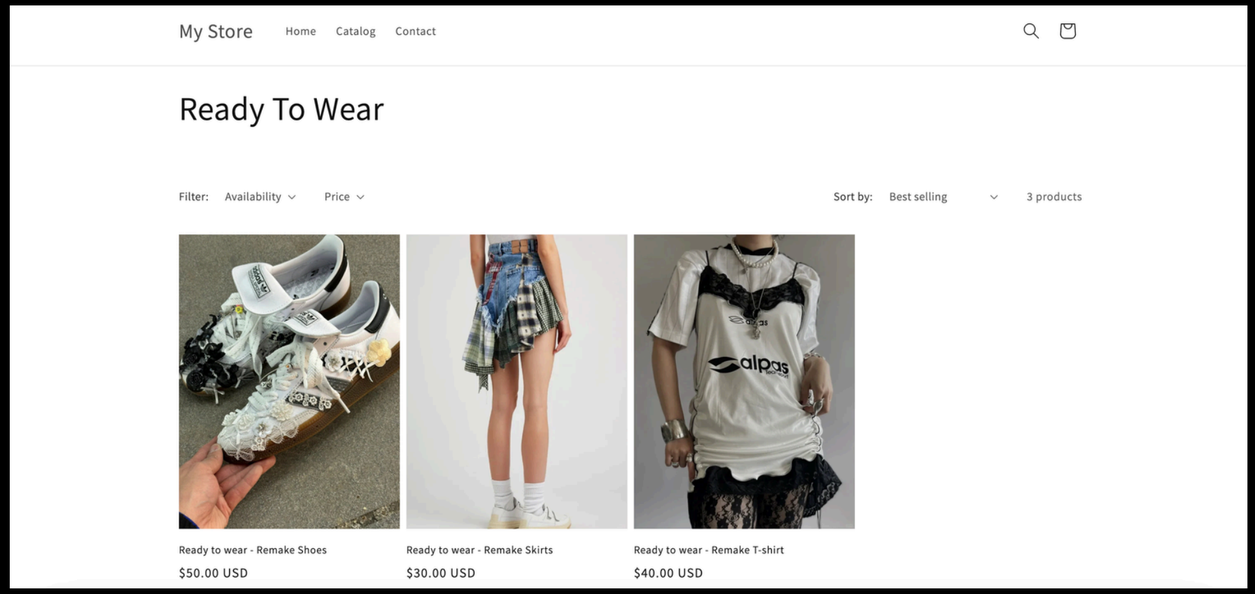


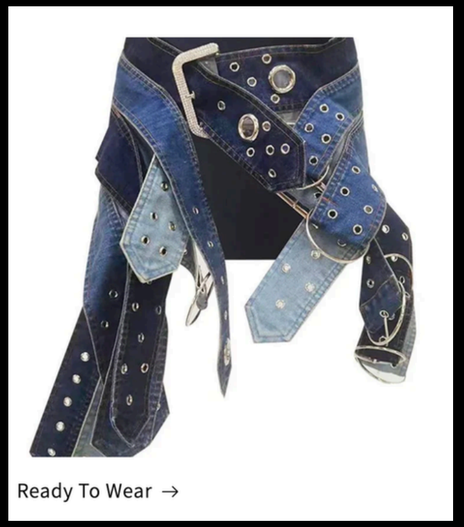
Customization：
If there is no style you like in the existing templet, you can also customize it. Send the clothes you want to remake and your ideas for the remake to communicate with the designer, and customize it to your own template.

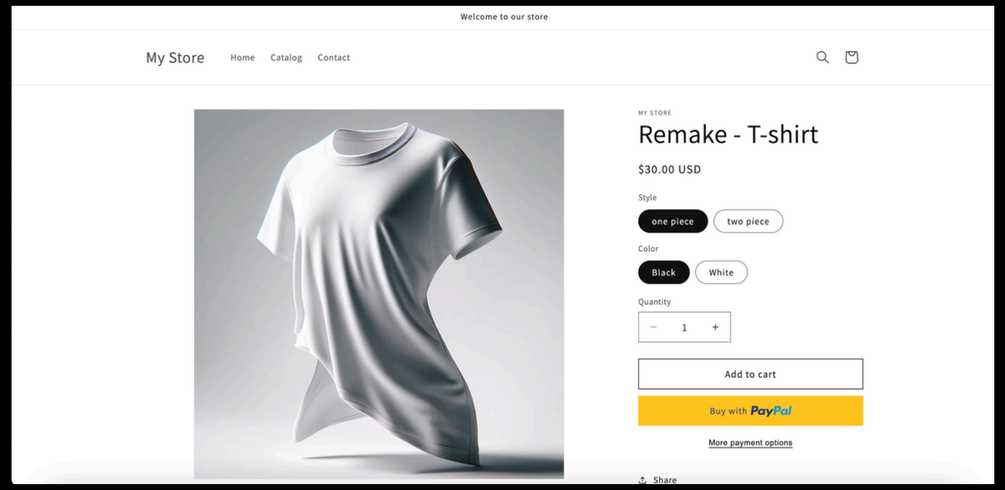


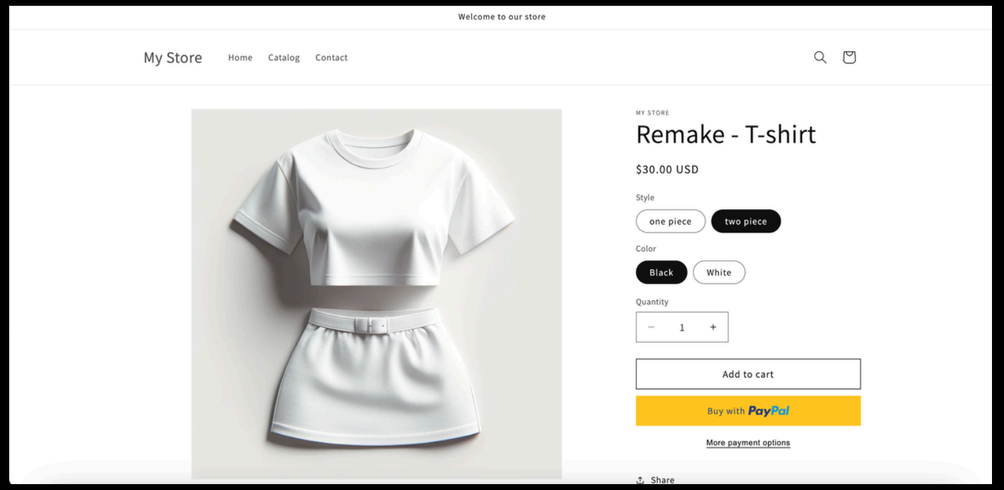


Ready-to-Wear：
IIt specializes in selling readymade clothes that are remake by donated clothes.

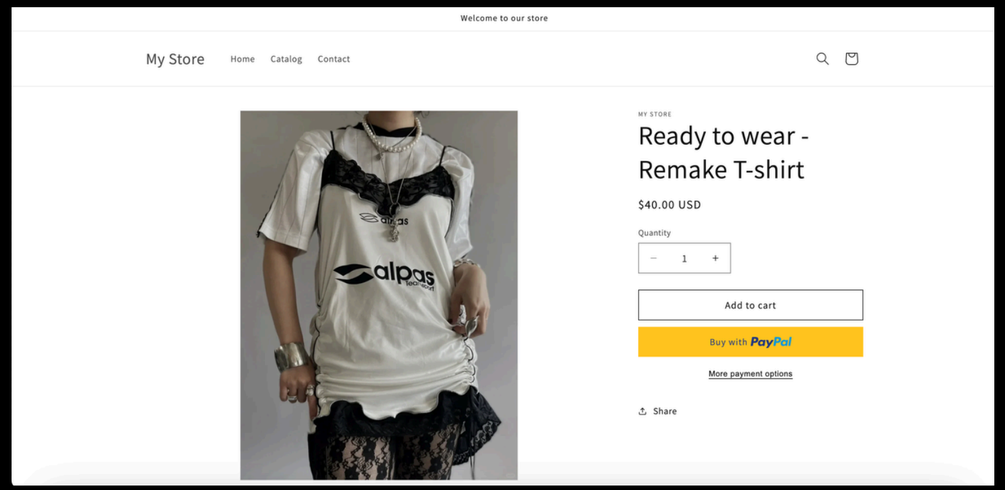


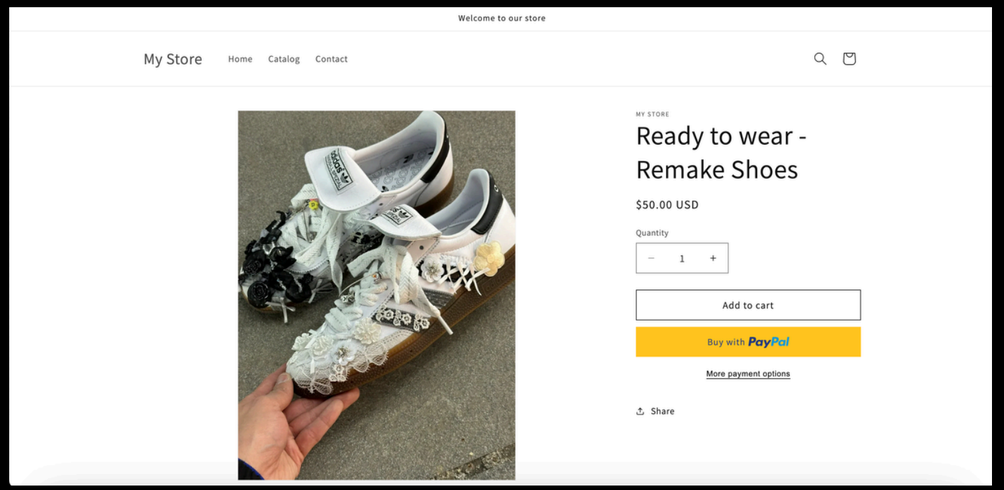




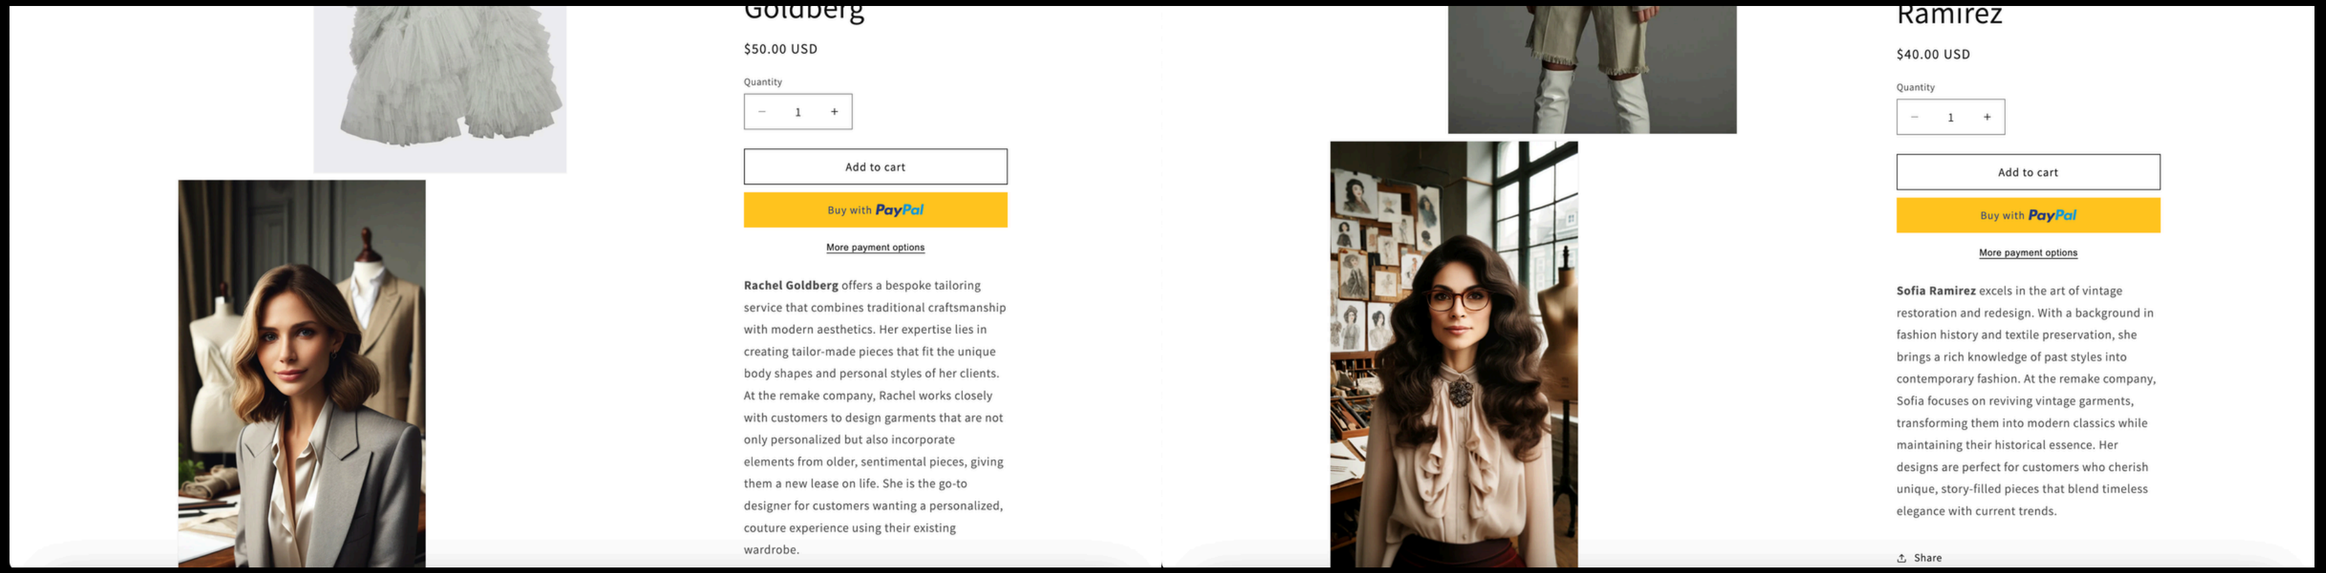


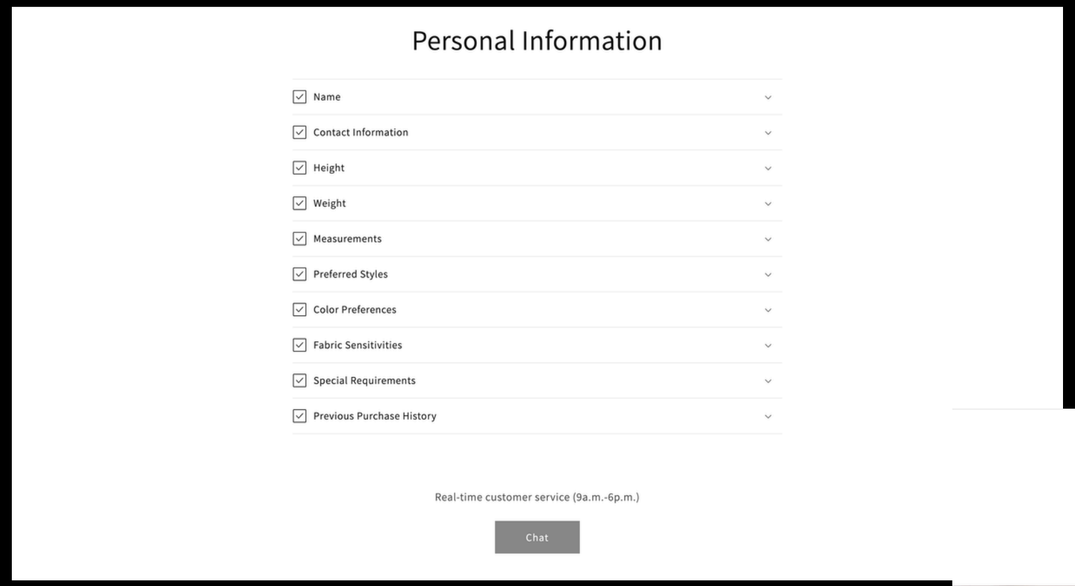
different choices for templet and products





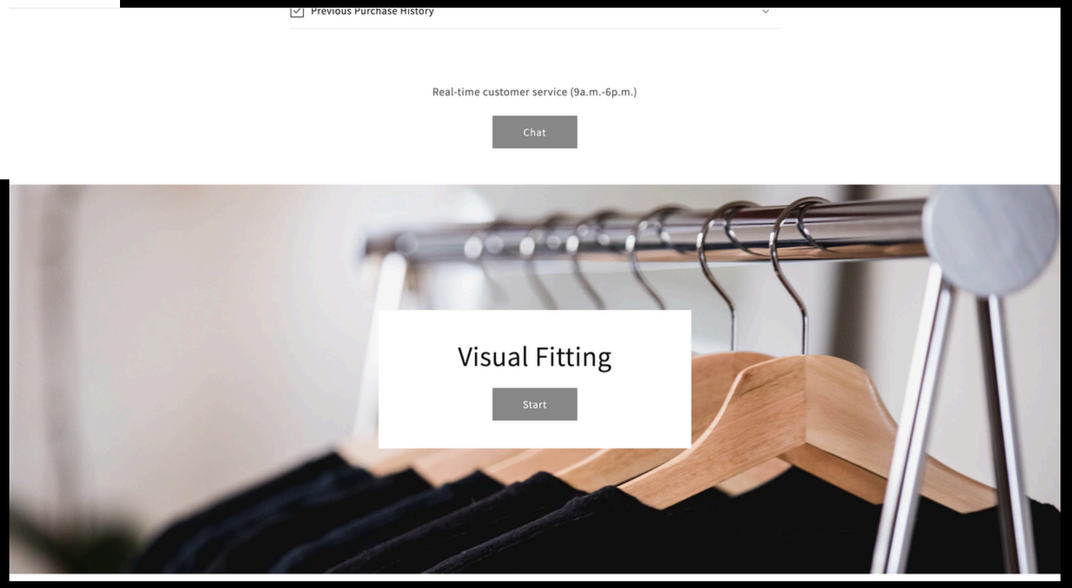
In the customization option, several designers will be provided for customers to choose. These designers will have different styles that they are good at, so that customers can have diversified choices and design works that can satisfy customers more.

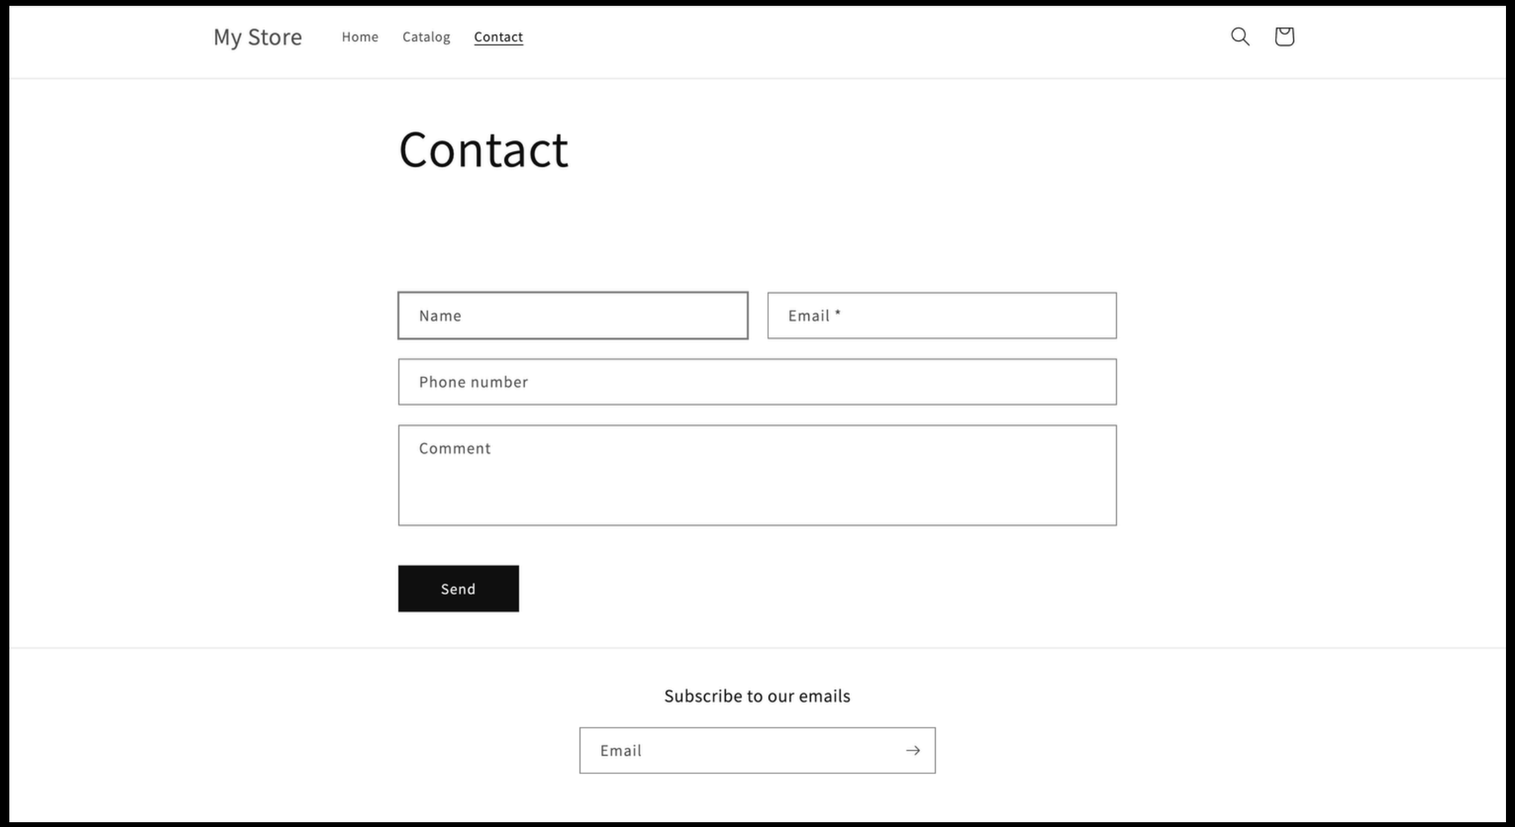




Each customer needs to fill in the detailed personal information, so that we can make the remake more suitable for the customer's needs.

Each product detail page will have a convenient manual customer service chat entrance and VR fitting function.





IIn addition to manual customer service, customers can also contact us by email to describe their needs in more detail.

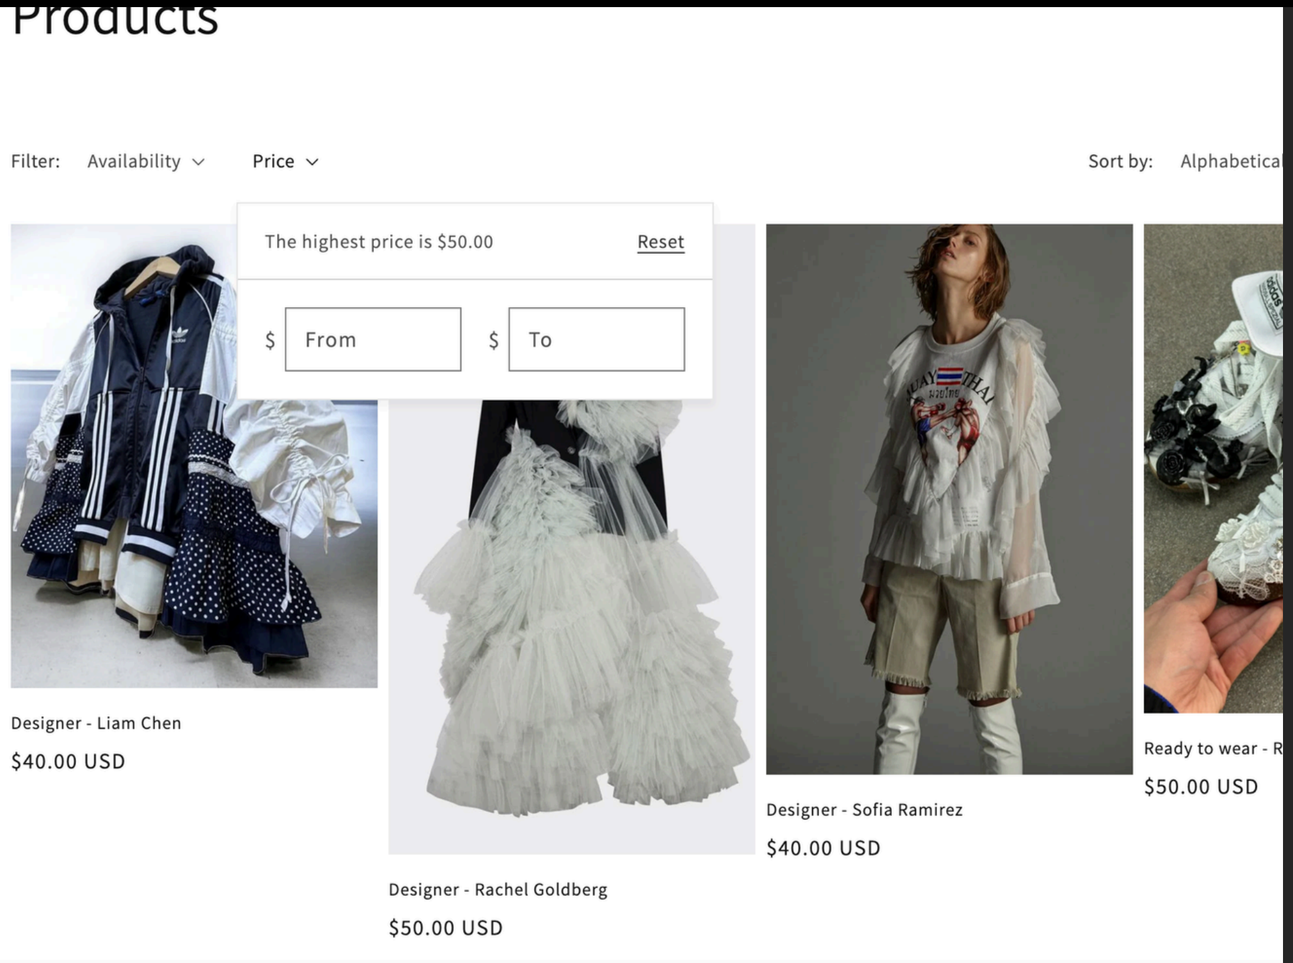
About us
"Rebirth Wardrobe" transforms old garments into fashionable, personalised new designs. This innovative platform provides potential for customisation service. The aim is to breathe new life into outdated or unused clothing, offering an eco-friendly solution for extending

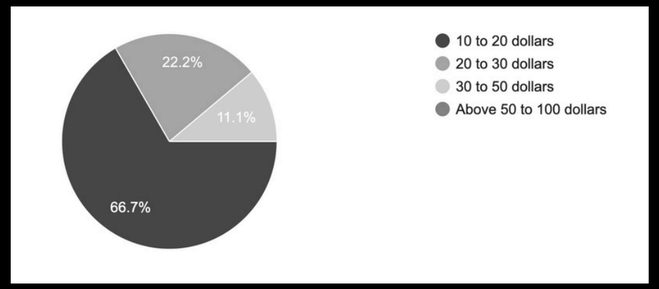
# BUDGETING



it’s important to think beyond price, to the value you are getting. When it is compared to the price per wear, it turns out to be a better deal as the sustainable product lasts longer.

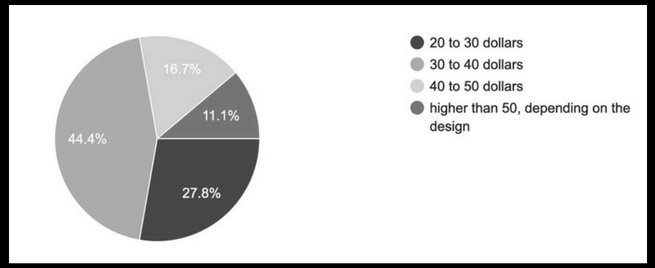
- most clothes will range from 30 to 50 dollars. Usually, sustainable fashion is a lot higher than most fast fashion brands as they are items that will last longer. But since we are giving back the same fabric that people send in, we can afford to make the clothing more affordable.
- Services like customisation will cost more, as it offers one on one sessions with individual designers and clients.
- Template products will have standard prices which remain constant.

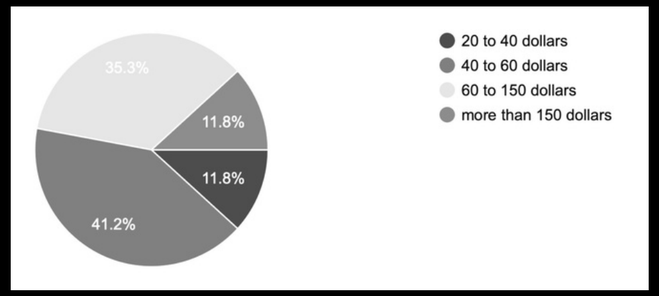
# How did we justify our budget?



How much would you be willing to pay for templated new designs which were made from second hand cloth?

If we were to offer you to work with a personal designer to customise your personal clothing designs, how much old you be willing to pay?





if we offer you the chance to buy ready to wear designs that follow the current trends, and are unique in style and created from second hand cloth, how much would you be willing to pay?

We conducted a survey within the community of our ideal customers in order to determine how much they would be willing to pay.

---

**The results of the survey determined that:**

- for the templated section, we could place our budget between 10 to 30 dollars
- For the Customisation section, we could place our budget from 50 dollars and above.
- And for the ready to wear section, we could place our budget from 25 to 55 dollars, depending on the design and quality.

## Key Partnerships

- Textile Suppliers
- Local Tailors and Designers
- Fashion Schools
- Logistics Companies
- E-Commerce Platforms
- Packaging Suppliers
- Influencers and Fashion Bloggers
- Marketing and Advertising Agencies
- Sustainable Fashion Organization

## Key Activities

- Collecting old clothes from customers.
- Designing and tailoring the clothes into new pieces.
- Marketing your services to attract customers.
- Managing logistics and customer service.

## Key Resources

- A team of skilled tailors and designers.
- An online platform where customers can place orders and send in their clothing items.
- Warehousing facilities for storing clothes before and after the redesign process.
- Materials for remaking clothes, like threads, buttons, zippers, etc

## Value Propositions

- Providing a new lease on life for old garments, reducing waste.
- Offering unique, personalized fashion items.
- Helping customers solve their old clothing problems
- Providing a budget-friendly option to revamp a wardrobe without purchasing new clothes.

## Customer Relationships

- Personalized consultation for each redesign project.
- Regular updates about the status of their clothing transformation.
- Community engagement via social media, sharing before-and-after stories to foster a sense of community.

## Channels

- Website and mobile app for order placement and customer support.
- Social media platforms for marketing and community building.
- Physical drop-off points or partnerships with retailers for clothes collection.

## Customer Segments

- Environmentally conscious consumers looking for sustainable fashion choices.
- Fashion-forward individuals seeking unique wardrobe items.
- Price-sensitive customers wanting to refresh their wardrobe economically.
- Anyone who throws away old clothing and unable to dispose of garments which were no longer need

## Cost Structure

- Labor costs for tailors and designers.
- Operating costs for logistics, warehousing, and shipping.
- Marketing and advertising expenses.
- Platform maintenance and development costs.

## Revenue Streams

- Fees charged for the redesign and remake service.
- Possible sales of redesigned clothing items through the platform or third-party sites.
- Subscription model for regular customers who want to refresh their wardrobe seasonally.
- Earning commissions by partnering with fabric or fashion accessory companies when customers use their products for their redesigns.
- Charging extra for highly personalized or intricate designs that require more work or exclusive materials.

# VISION FOR THE FUTURE

# FUTURE DEVELOPMENT DIRECTION

**Diversifying Product Lines:** Expand beyond clothing into areas such as shoes, accessories, and home goods, offering comprehensive sustainable fashion solutions.

**Technological Innovation:** Utilize technologies like virtual reality (VR) and augmented reality (AR) to provide more immersive, interactive shopping experiences, helping consumers better understand and select products.

**Sustainable Supply Chain:** Establish a more transparent, eco-friendly supply chain system, from raw material sourcing to production and logistics, reducing negative environmental impacts.

**Community Building:** Create a vibrant community platform for designers, artists, and consumers to engage and share, fostering creativity and cultural exchange.

**Global Expansion:** Expand into international markets, collaborating with more designers and brands to promote the spread and adoption of sustainable fashion principles worldwide.
